

Winkeo FIDO U2F

Web/Cloud strong authentication solution

- ✓ USB «plug'n play» secure second factor solution to simplify online identity management
- ✓ Fully compliant with FIDO U2F specifications
- 1** Identity keys are stored inside a smart card component
 - EAL5+ common criteria certification
 - Up to 200 identities stored on the device
- 2** Easy to use
(No software installation required)
- 3** Compatible with Gmail, Google Apps for Work, Facebook and Dropbox

Compatible with:

Dropbox

GitHub

WORDPRESS

OVH.com
Innovation is Freedom

FastMail

NEOWAVE

FIDO U2F Security features:

- Easy to use and deploy (HID device: no driver required)
- Full compatibility with Windows, Mac and Linux
- No security failure in case of key or password theft (Authentication requires both of them)
- Second factor authentication fully compliant with google services through Chrome and Firefox browsers
- Extended compatibility (Salesforce, Office 365, etc.) through Web SSO and federation identities providers
- Private key storage based on smart card component (PKI / elliptic curves)
- Anti-Phishing protection (much more secure than SMS and OTP /TOTP solutions)
- No key wrapping / No built-in shared key

About FIDO:

FIDO (Fast IDentity Online) Alliance gathers a wide range of technology players (Google, Microsoft, ING Bank, PayPal, Qualcomm, Lenovo, MasterCard, Alibaba, RSA, NXP, ARM, Infineon, Idemia, Gemalto, Safran, DELL, etc.). This non-profit organization aims to specify and promote simple and interoperable PKI-based security architectures (Public Key Infrastructure) to enhance online authentication security.

FIDO U2F enables the use of a secure second factor to strengthen username and password login process. FIDO U2F specifications became available in December 2014 and were immediately implemented by Google on its own authentication portal. Since then, FIDO support has been adopted by many online services (Dropbox, Github, etc.) and web SSO providers.

Winkeo keys are in conformity with FIDO U2F specifications and provide a simple solution for online user authentication (web/cloud). NEOWAVE assist digital trust service providers (digital signature, registered letter, consent, financial and insurance services, health...) in the integration of these new technologies in their information system. The Winkeo key is designed and made in France.

About NEOWAVE:

NEOWAVE is an innovative French company, created in 2007, specializing in strong authentication and secure transactions. NEOWAVE products combine the high level of security provided by smart card with the advantages of connectivity and storage technologies: USB, RFID / NFC and Bluetooth Low Energy (BLE). NEOWAVE products and services address the cybersecurity, digital trust and identity management markets.
