Sagem-Orga will demonstrate SIMply U devices based on smart object technology from Neoware

Berlin SIMposium, April 22nd -23rd.

Neowave is offering its Smart Object technology to the SIMply U range of UICC (Universal Integrated Circuit Card) empowered dongle from Sagem Orga to create innovative solutions of convergence within communication services. At Berlin SIMposium booth 103, Sagem-Orga will demonstrate SIMply U devices based on the state of the art smart object technology from Neowave featuring: USB key format innovative design Built-In SIM card reader Plug & play solution

- -- Driverless
- -- Auto-install Flash drive with Secure User Flash Memory space State of the art Sagem-Orga SIM card for device security management. Dmailer bundled application Vitendo UMA/GSM and SIP/IMS Softphone Smart Object technology from Neowave is breaking the barrier of smart card in terms of connectivity and mass storage capacity to boost end users empowerment, taking benefits from new web services proposed by MNOs (Mobile Network Operators) and MVNOs (Mobile Virtual Network Operators). An easy and secure connection to PC and Web services based on Smart Objects will provide end users seamless continuity of services in miscellaneous environments. Subscribers will also take advantage of the flash drive function to safely store their personal data they use in their daily life. The SIM card will securely control the access to the partitioned Flash mass storage memory. Bundled applications will be also stored in the Flash memory to offer attractive solutions to consumers, such as:
- Vitendo's convergence platform supporting state-of-the-art UMA/GSM and SIP/IMS solutions
- Portable backup and synchronization software solutions for mobile devices with Dmailer

Combining their expertise in secure transaction and their knowledge in communication market, Sagem Orga and Neowave are offering tools for multiple access solutions to end users. This Berlin event demonstration is the first step in the Sagem Orga-Neowave partnership to develop smart objects based on convergence solutions. Smart Objects are new portable and secure e-medias providing users connectivity to PC and Web. They feature a huge memory capacity and processing power in addition to the standard contactless smart cards capabilities. They represent and identify their owner in its environment allowing him to perform secure transactions with excellent ergonomics thanks to an innovative design and format.
