Neowave wins a Sesame 2009
on the 2009 CARTES & Identification tradeshow

Leader on the Smart Objects market, NEOWAVE is awarded for the "Best IT Security application"

Every year, 10 SESAMES Awards are presented to the best projects in various categories. The Sesames represent an unchallenged seal of approval in innovation and are regarded as global standards for card manufacturers and related industries.

This year, Neowave wins the "Best IT Security application" Sesame for its business solution: *Weneo ID* and was also nominated for the "Best Transport application" with the *Weneo Duo* Solution.

Weneo ID:
Neowave invents the Smart Object for enterprise.

A single pass to your enterprise:

1. Logical Access Control

2. Physical Access Control

3. NFC/RFID Services (Payment, e-Ticketing, etc)

Weneo ID helps organisations protect their informational and physical assets, while simplifying the daily life of their contributors and optimising costs.

Weneo Duo:
the new generation of Smart Objects with 2 Smart Cards

1. Contactless access and validation on heterogeneous networks

2. Online connectivity and reloading for both chips

3. Multiple NFC/RFID transactional services with both chips

4. Personal productivity (flash memory)

About Neowave

With Smart Objects as its core business, Neowave revolutionizes dematerialization and online services by simplifying secure Internet and contactless transactions for various communities of users. Weneo Smart Objects combine the high level of security provided by Smart Cards with the benefits of USB connectivity and contactless NFC/RFID technologies. Neowave's products and services address the needs of the following user communities:

- *Local governments: contactless validation of mass transit tickets, physical access to municipal services and collective infrastructures (pools, library, etc), with online booking and reloading.*

- *Enterprises: physical and logical access control, electronic signature using certificates securely stored on the device, e-payment at the cafeteria, e-ticketing, etc.*

- *Banking: strong web authentication for secure access to accounts, electronic signature using certificates securely stored on the device, online payments and contactless micro-payments.*

- *Other communities: education, health, sports clubs, etc.*

- *Founded in June 2007 in Gardanne, at the heart of the SCS cluster (Secure Communication Solutions), Neowave was built on the expertise of its founders in Smart Card technology, embedded software, secure components and high-tech end-user products.*
